PROFESSIONAL SUMMARY

Computer Science undergraduate passionate about software development with strong fundamentals in Object-Oriented Programming, Data Structures & Algorithms, DBMS, and SQL. Enjoy building practical applications, writing clean code, and continuously improving problem-solving and programming skills through hands-on projects.

TECHNICAL SKILLS

Programming Languages:	Java, Python, JavaScript
Core CS Concepts:	Object-Oriented Programming (OOP), Data Structures & Algorithms, Arrays, DBMS, Operating Systems, Computer Networks, SQL
Databases:	MySQL
Web Technologies:	React, Node.js, Express.js, HTML, CSS
Developer Tools:	Git, GitHub, VS Code

EDUCATION

GL Bajaj Group of Institutions, Mathura — B.Tech (CSE)	CGPA: 7.2
John Milton Public School, Agra — Class XII	70%
S.M.K English Medium School, Firozabad — Class X	86%

PROJECTS

1. Delta AI | *HTML, CSS*

Currently developing an AI-powered multi-domain performance intelligence platform focused on analyzing performance and delivering actionable insights.

- Designing a modern, responsive user interface and structuring the frontend using HTML and CSS.
- Creating custom Delta AI branding to establish a distinct visual identity.
- Structuring a clean, organized frontend codebase to support future development.

2. Project Tree Tracker | *React, TypeScript, Gemini API, Vite, Tailwind CSS*

An AI-powered web application that converts screenshots of project directory structures into interactive, trackable project workspaces using multimodal AI.

- Developed a React/TypeScript application that uses Google Gemini multimodal AI to analyze project-structure screenshots and convert file/folder hierarchies into structured, interactive trees.
- Implemented file-level verification, data/content tracking, custom task management, search/filtering, and project progress analytics.
- Built multi-image structure analysis and merging with local state persistence, responsive UI, and reusable component architecture using Vite and Tailwind CSS.

3. Heritaura — Heritage Monument Explorer | *React, JavaScript, HTML, CSS*

- Developed a responsive frontend interface enabling users to explore Indian heritage monuments through an interactive, user-friendly UI.
- Designed component-based architecture in React to ensure scalability and maintainability of the codebase.
- Structured the application architecture to support future integration with backend services and a database layer.

EXPERIENCE

College Ambassador — Internshala	Remote, 2024
- Promoted internship and upskilling opportunities among engineering students across campus. - Conducted outreach campaigns, strengthening communication, leadership, and stakeholder engagement skills.	

CERTIFICATIONS

- Python Programming
- Build a Computer Vision App with Azure Cognitive Services – Microsoft (Coursera)
- Introduction to Cyber Security – Simplilearn SkillUp
- AI Tools & ChatGPT Workshop – be10x

LEADERSHIP & ACTIVITIES

- College Ambassador at Internshala; regularly practice Data Structures and Algorithms to strengthen problem-solving skills.

ADDITIONAL INFORMATION

Languages: English, Hindi | **Interests:** Software Development, Problem Solving, Product Engineering, Communities
